

Assessment Solutions

Chapter 10 – Implementing Association, Aggregation, and Composition

1. Please see `Chapter10/Assessments/Chp10-Q1.cpp` in the GitHub repository.
(follow-up question) Once you have overloaded a constructor that accepts a `University &` as a parameter, this version may be invoked using a `University *` by first dereferencing the pointer to the `University` within the constructor call (to make a referenceable object).
2. a – f: Please see `Chapter10/Assessments/Chp10-Q2.cpp` in the GitHub repository.
3. a – b: (Optional) Please see `Chapter10/Assessments/Chp10-Q3.cpp` in the GitHub repository.
