Assessments

The programming solutions for each chapters' questions can be found in our GitHub repository at the following URL: `https://github.com/PacktPublishing/Deciphering-Object-Oriented-Programming-with-CPP/tree/master`. Each full program solution can be found in the GitHub in the subdirectory `Assessments` and then under the appropriate chapter heading (subdirectory, such as `Chapter01`), in a file that corresponds to the chapter number, followed by a dash, followed by the solution number in the chapter at hand. For example, the solution for Question 3 in Chapter 1, can be found in the subdirectory `Assessments/Chapter01` in a file named `Chp1-Q3.cpp` under the aforementioned GitHub directory.

The written responses for non-programming questions can be found, organized by chapter, within the aforementioned GitHub `Assessments` subdirectory. For example, `Assessments/Chapter01/Chp1-WrittenQs.pdf` will contain the answers to the non-programming solutions for Chapter 1. Should an exercise have a programming portion and a follow-up question, the answer to the follow-up question may be found both in the aforementioned .pdf file and in a comment at the top of the programming solution on GitHub (as it may be appropriate to review the solution in order to fully understand the answer to the question).
